Servo solutions for Continuous & pulse duty applications

Receive the ultimate in performance and flexibility for machinery manufacturers with a broad range of servo drives and motors.

Digitax HD

0.25 kW - 7.5 kW
(0.6 hp - 9.8 hp)

200 V | 400 V

Bring superior performance to high dynamic, pulse duty applications, where high peak torque is essential for fast acceleration with the ~Digitax HD range.

Unidrive M700

0.75 kW - 2.8 MW
(1 hp - 4,200 hp)

200 V | 400 V | 575 V | 690 V

Providing optimum performance and an extensive power range - M700 is the ideal option for continuous duty applications that need precise continuous torque delivery.

Unimotor hd

Pulse Duty
Servo Range

0.64 - 85 Nm

Unimotor hd is a comprehensive family of high-performance AC brushless servo motors. With a wide torque and speed range and a broad selection of feedback options, Unimotor hd offers the perfect match for Digitax HD and Unidrive M700 to meet any application requirement.

5 year warranty as standard*

Our Digitax HD series is so reliable we are confident enough to supply it with five-year warranty as standard.

Now you can buy with the same confidence.

*Warranty terms and conditions apply.

Minimum size Servo solutions

1.5 A – 16 A with 48 A peak

200 V | 400 V

Downsize cost and upsize floor space

With a tiny footprint but exceptional power density, Digitax HD is one of the smallest servo drives on the market today. Build the most compact cabinets possible.

The market's narrowest servo drive

- Digitax HD is just 40 mm (1.6 in) wide
- 25 drives, up to 16 A per drive, can fit in just 1 m (40 in) of cabinet space

Drive dimensions

Frame size	Dimensions H x W x D mm (in)	Weight kg (lb)	Nominal current @ 400 V A	Peak current @ 400 V A
1	233 x 40 x 174 (9.17 x 1.57 x 6.85)	0.75 (1.65)	4.2	12.6
2	278 x 40 x 174 (11.0 x 1.57 x 6.85)	1.3 (3.0)	10.5	31.5
3	328 x 40 x 174 (12.9 x 1.57 x 6.85)	1.5 (3.3)	16	48

Frame 1
Actual size

Ultraflow™ thermal management

Keep cabinet sizes compact

Heat management

Create shorter cabinets by directly stacking rows of drives. Nidec Drives' unique Ultraflow™ technology expels heat directly outside the cabinet through the rear of the drive* and stops heat building up in the cabinet.

No contamination

Ultraflow's™ guided internal airflow prevents ingress on drive circuits and, combined with conformal coating, minimises contamination risk.

Smart fan control

An intelligently controlled fan means fans last longer and create less acoustic noise while contributing to the maximum thermal cooling by Ultraflow™.

Easy installation

Ultraflow™ requires only a 32 mm (1.25 in) hole in the cabinet meaning rapid, trouble-free installation**

Ultraflow™ is a registered Trademark of Control Techniques

* Drive heat dissipation can also be achieved via vents on top of the drive, as standard.

** Frames 2 and 3 require 2 x 32 mm (1.5 in) holes

Maximum performance Servo solutions

Boost throughput with maximum control

Get the best throughput and production quality in your machines by using Digitax HD, the perfect drive for high-dynamic applications.

- 300 % peak current performance
- Optimised control loops for high dynamic performance
- 62.5 μ s current loop
- 250 μ s position and speed loop
- Unique 'dead beat' current controller for maximum bandwidth
- Up to 16 kHz switching frequency (default ratings specified at 8 kHz)
- Advanced bi-quad filters for suppression of mechanical resonances

Improving accuracy through precision encoder feedback

The flexible speed and position feedback interface supports a wide range of feedback technologies, from robust resolvers to high resolution encoders:

- Up to three onboard encoder channels simultaneously e.g. 1 feedback encoder, 1 reference encoder and 1 simulated output
- Quadrature, AB Servo, SinCos (including absolute), SSI, BiSS, EnDat 2.1, 2.2 and 3 Hiperface and resolvers
- Simulated encoder output can provide position reference for cams, digital lock and electronic gearbox
- Up to 25 bit encoder resolution on Unimotor hd
- Feedback accuracy as low as ± 20 arcsec on Unimotor hd
- Simplify installation - 2 wire flexible cables
- Speed up commissioning - electronic nameplate
- Reduce cable marshalling equipment - drag chains etc
- Reduce wiring errors
- Better diagnostics

From standalone...

Single AC input

Communication links

Common DC bus and earth

24 Vdc links

...to a modular common DC bus system

Integrated safety

The new paradigm of system design

Modern industrial processes face a three-fold challenge: the constant demand for increased machine throughput, matched by a parallel need to reduce complexity and points of failure, all the while ensuring the health and safety of human operators and allowing them interaction with the running process.

Modernising system design, replacing traditional electro-mechanical safety components with the capabilities of the latest generation of variable speed drives, is the new standard across industries to increase efficiency and availability.

Digitax HD offers integrated single or dual Safe Torque Off (STO) inputs, certified to SIL3 / PL_e, providing an elegant and more reliable solution over traditional motor contactors.

Enhanced, decentralised motion safety with the MiS250

Relying only on a centralised safety PLC can mean additional cost through complexity of the wiring and the safety software.

The MiS250 safety option for Digitax HD extends the built-in STO with motion safety capability and enables decentralised flexibility with the option of safety over network connectivity. This can reduce demand upon - and therefore reduce the cost of - the central safety PLC, with the additional benefit of reduced wiring and faster reaction times.

The safety module simply clicks into place, with no screws or other mounting requirements. Once fitted, the safety functions provided by the MiS250 are seamlessly incorporated into the drive's feature set. Taking advantage of the Safe EnDat protocol, the MiS250 achieves up to SIL3 / PLe with just a single encoder.

The MiS250 has been independently assessed by TUV Rheinland to meet the following standards:

- IEC 61508 SIL3
- IEC 62061
- ISO 13849-1 PLe
- IEC 61800-5-2
- European Machinery Directive 2006/42/EC

MiS250 adds the following motion safety functions to Unidrive:

- Safe Stop 1 (SS1)
- Safe Stop 2 (SS2)
- Safely Limited Speed (SLS)
- Safe Operating Stop (SOS)
- Safe Direction (SDI)
- Safe Speed Monitor (SSM)
- Safe Emergency Stop (SES)
- Safely Limited Position (SLP)
- Safely Limited Acceleration (SLA)
- Safe Brake Control (SBC)
- Two Hand Control (STHC3)

Additionally, these motion safety functions can be controlled over the following safe networks:

- Safety over Ethernet with CIP Safety
- Fail Safe over EtherCAT, FSoE

Safety over
EtherCAT®

Minimum effort Rapid installation

Our innovative design means you only increase drive size when option modules are used. That means you can save oodles of space in the overall configuration.

The multi-axis paralleling kit includes busbars for quick connection of DC bus and earth link, as well as Quick Links to distribute 24 Vdc supply across drives:

- Reduces installation time and cost
- Improves energy efficiency and footprint

The LED display ensures access to drive diagnostics even in the absence of network connectivity.

Includes 2 rotary switches for hardware setting of the node address for faster commissioning of the motion network.

AC input

DC bus cover

Communication ports

24 Vdc Input

I/O

Dual Safe Torque Off (STO)

Motor earth

The motor power connector is in the same position for all frame sizes, making cable routing easier and tidier.

● Easy access pluggable connectors

External Brake Resistor Connector

Fixing points for cable ties on the top, front and base of the drive for compact wire routing.

Drive alignment aid (alternative to DIN rail alignment)

Ultraflow™ Vent cover (optional)

Rear duct for Ultraflow™ thermal management technology (optional)

Screw slot allows a fixed hole pattern to fit any drive combination

DIN rail alignment

SI-Option module slots allow for expansion of drive capabilities

SD card slot for local backup, quick drive replacement and repeat commissioning

Adding the option mounting kit adds a very small additional 22 mm (0.86 in) width, giving you a maximum drive width of 62 mm (2.44 in).

Easily replaceable fan

Removable cable screen bracket for quick installation or replacement

Encoder input/output

Rapid Commissioning

Connect

The Connect PC tool is for rapid commissioning, plus optimising and monitoring drive/system performance:

- Task-based drive operations are simplified with intuitive graphical tools in a familiar Windows environment
- CTScope – a realtime software oscilloscope – facilitates tuning and monitoring
- Dynamic logic diagrams and searchable parameter listings
- Tool is scalable, through optional add-ins, to match application requirements
- Multiple communications channels for a more complete overview of the system
- Drive discovery gives the ability to find drives on a network automatically without the user having to specify their addresses
- Offline configuration

SD card

Standard SD cards can be used for quick and easy parameter and program storage.

Remote mountable keypad*

Flexible mounting on the outside of a panel, for quick changes to drive parameters or reading diagnostics.

*Requires KI-Compact 485 adaptor to connect keypad to drive

Plug-and-play motor connection

Automatic electronic motor nameplate identification for fast setup.

M750 Ethernet

The multi-protocol drive that does it all

M753 EtherCAT

For high-performance centralised motion control architecture

M754 MCi

Servo drive and controller in one

M751 Base

Configuration flexibility with option modules

M750

Ethernet

Multi-protocol network drive for centralised and decentralised motion applications

Digitax M750 Ethernet

- Onboard multi-protocol Ethernet, supporting Real Time Motion over Ethernet (RTMoE), EtherNet/IP, Modbus TCP/IP and PROFINET RT
- Onboard advanced motion controller for 1.5 axis motion control
- Ethernet webpages hosted onboard the M750 Ethernet drive
- Reduced downtime with machine safety
 - i. Integrated dual Safe Torque Off (STO)
 - ii. Meets SIL3 and PLe
 - iii. Safe motion and CIP Safety with MiS250 option (see p.9)

Advanced Motion Controller onboard

Advanced 1.5 axes motion controller, key features include:

- 250 μ s cycle time
- Interpolated cam
- Motion profile generator
- Homing functions
- Electronic gearbox
- High speed position freeze

RTMoE

Digitax HD's standard Ethernet supports RTMoE (Real-Time Motion over Ethernet) which provides synchronised communication between drives using the Precision Time Protocol as defined by IEEE1588 V2:

- Distributed clocks are used to automatically synchronise the position, speed and current loops across all drives
- High speed network synchronisation with less than 1 μ s jitter (typically <200 ns) and 250 μ s cycle time for synchronous cyclic data

PLe

Multi-Protocol

A single drive that does it all

Nidec Drives' philosophy has always been to support innovators, regardless of which communications protocol they may use. It's for them that we've developed the most flexible servo drive platform on the market.

Having multiple protocols supported by one drive means that different systems can share one design, reducing engineering effort and complexity, and helping to rationalise inventory of parts and spares. But we didn't stop there. Today Digitax HD drives offer EtherNet/IP, Modbus TCP/IP, RTMoE and PROFINET RT as standard, on a single drive platform, simultaneously.

PLC Controlled Motion

PLC Controlled Motion facilitates the integration of Nidec Drives drives into major PLC architectures, simplifying the process to the point where our drives can be swapped into an application in a matter of hours.

A single installation will load all the function blocks and documentation required, as well as example projects to get the application up and running as quickly as possible. With the guided setup sequence provided inside the Connect software tool, users are taken through the setup process step-by-step, resulting in a ready-to-use configuration that can be loaded straight into the drive.

Utilising the high-performance Advanced Motion Controller inside Digitax HD once again yields significant performance benefits, and gives the possibility to create complex motion completely decoupled from the performance and computational power of the external PLC.

 RTMoE	✓ 250 μ s drive-to-drive synchronous data transfer
	✓ Support for RPI as low as 2 ms
	✓ Maximum of up to 10 concurrent connections
	✓ Support for 1 ms cyclic link cycle times

Frequency control

Allows frequency control of an open-loop axis.

RPM control

Allows speed control of a closed-loop (inc. sensorless) axis.

Speed control

Allows speed control of an axis, with dynamic control over motion parameters. With dedicated jogging reference.

Position control

Single motion or up to 10 index moves can be defined and executed. Multiple homing modes.

Electronic gearbox control

Electronic gearbox scaled motion. Master reference switchable at the PLC at run-time. Multiple homing modes.

M753

EtherCAT

For high-performance centralised motion control applications

Digitax M753 EtherCAT

- Digitax M753 features an integrated 2-port EtherCAT switch for easy integration in centralised motion control applications
- EoE (Ethernet over EtherCAT) support allows PC tool connection for commissioning and monitoring over the EtherCAT network
- The station alias can be dynamically assigned by the EtherCAT master, or hardwired with the two rotary switches built into the display
- An optional RS485 adaptor is available, providing a back-up PC tool connection in case of network failure

High performance with flexibility

Operate with any automation product via EtherCAT

- Operate with motion controllers, motion PLCs and Industrial PCs via built-in EtherCAT
- Dual 100 Mbps EtherCAT interfaces for use with in-line topologies
- Non-cyclic data communication using the CANopen over EtherCAT (CoE) mailbox

Flexibility for all applications achieved through full access to drive functions

- CANopen over EtherCAT (CoE) with CiA-402 profile including:

i. Cyclic synchronous position mode	v. Interpolated position mode
ii. Cyclic synchronous velocity mode	vi. Velocity mode
iii. Cyclic synchronous torque mode	vii. SDO access to all profile objects and drive parameters
iv. Homing mode	

EtherCAT

PLc

SIL3

TÜVRheinland®
Precisely Right.

Improved productivity with machine safety

The built-in dual Safe Torque Off is certified to SIL3 / PLe. With the MiS250 option (*), the integrated safety can be extended to include

- Safe Motion
 - i. Safe Stop 1 (SS1)
 - ii. Safe Stop 2 (SS2)
 - iii. Safely Limited Speed (SLS)
 - iv. Safe Operating Stop (SOS)
 - v. Safe Direction (SDI)
 - vi. Safe Speed Monitor (SSM)
 - vii. Safe Emergency Stop (SES)
 - viii. Safely Limited Position (SLP)
 - ix. Safely Limited Acceleration (SLA)
 - x. Safe Brake Control (SBC)
 - xi. Two Hand Control
- Fail Safe over EtherCAT
 - xii. Up to 32 booleans and 4 integers communication interface
 - xiii. Safe speed and position transfer to safety controller

(* Refer to page 9

Rapid and flexible commissioning

- Ethernet over EtherCAT (EoE) for PC tool communication
- File over EtherCAT (FoE) for drive parameter transfer
- Rotary dials can be used for local setting of the station alias

Machine controllers

M754 MCI

Servo drive and controller in one

Digitax M754 MCI

A powerful MCI second processor onboard the Digitax M754 servo drive brings a whole host of machine design opportunities.

The onboard MCI processor executes comprehensive programs that can control multiple drives and motors simultaneously across real-time networks.

Onboard Ethernet using RTMoE (Real Time Motion over Ethernet) provides synchronisation and communication between drives using the Precision Time Protocol (PTP) as defined by IEEE1588 V2.

Simple integration with external components such as Remote I/O, HMIs and PLCs can be achieved with Modbus TCP/IP on the integrated 2-port standard Ethernet switch.

- Two Ethernet ports with an internal switch
- Support for standard Ethernet protocols
- RTMoE for synchronised cyclic data at 250 μ s
- Modbus TCP/IP master

RTMoE

SIL3

PLe

Machine control studio

Fast programming and commissioning

The Machine Control Studio programming environment provides a flexible and intuitive environment for programming automation and motion control features.

The software provides programming for:

- Onboard PLC
- Integrated MCI on M754
- MCI200 or MCI210 integrated machine control modules
- Ethernet network data configurations

Productivity features also supported:

- Intuitive IntelliSense functionality helps to write consistent and robust programs speeding up software development
- Programmers have access to a vibrant open-source community for function blocks
- Machine Control Studio also supports customers' own function block libraries

Familiar automation programming languages

The programming environment is fully IEC 61131-3 compliant and therefore familiar, fast and easy to use for control engineers around the world. The following IEC 61131-3 programming languages are supported:

- Structured Text (ST)
- Function Block Diagram (FBD)
- Structured Function Chart (SFC)
- Ladder Diagram (LD)
- Instruction List (IL)
- Continuous Function Chart (CFC)

Unimotor HD

High dynamic servo motor

For pulse duty applications

Unimotor HD is a high dynamic brushless AC servo motor range designed for use in pulse duty applications where rapid acceleration and deceleration is required.

High torque to inertia ratio

Unimotor HD has a high power to weight ratio, meaning that it can be easily integrated into the smallest, most demanding applications such as industrial robotics, pick & place and packaging.

Patented rotor technology

High torque to inertia ratio for high dynamic performance

Supported by rigorous testing for performance and reliability

Windings to suit 400 V and 200 V

Rated speeds include 1,000 rpm – 6,000 rpm depending on motor size

IP65 conformance: sealed against water spray and dust when mounted and connected

Segmented stator design for high power density and compactness

0.7 Nm to 85.0 Nm (6.2 lb-in to 752 lb-in) and up to 300% overload

Compact but powerful

Parking brake available

2 wire encoder technology

Support for the latest single cable encoder technology - EnDat 3
Plug and Play with motor parameters automatically read by the Digitax drive.

Energy Efficiency

M75C CapShare Capacitor Module

Available in 200 V and 400 V variants, the M75C CapShare Capacitor Module is contained within a M75x Frame 1 chassis measuring 40 mm width. M75C CapShare Capacitor Module is designed for use in multi-axis applications to offer:

- Ways to cope with fluctuations in power supply by increasing the ability to ride through short cut outs in mains power
- Dynamic performance with quick-access energy storage for fast acceleration / deceleration
- Energy efficiency as more energy can be stored rather than being wasted as heat

M75C CapShare Capacitor Module units can be paralleled in a scalable architecture, which is also quick and easy to install with DIN rail alignment, and easy DC bus paralleling.

Product code	M75C-01201740	M75C-01400725
Rated voltage	200 V	400 V
Onboard capacitance	1740 µF	725 µF
DC supply	200-370 Vdc	360-760 Vdc
External 24 Vdc supply for control		Yes
Internal current Inrush limitation circuit		Yes
Status relay (potential free contacts)		Yes
Status indication on front panel		Single LED
Thermal protection		Yes

Top vent for natural convection cooling

Common DC bus links & parallel connection

DIN rail alignment

24 Vdc parallel connection

Status LED

Status relay contacts

Common DC bus and Active Front End (AFE)

- Easy common DC bus connection enables braking energy to be recycled within the drive system, optimising energy usage.
- Any Digitax HD drive can be used as an AFE to create a regenerative AC drive system.
- AFE also provides power factor control for power quality management, and greatly reduced unwanted power harmonics.

Environment safety

Electrical

conformance

Environment

- IP rating: M75x drives are rated to IP20 (dry, non-conductive contamination)
- UL open class
- Ambient temperature -20 °C (-4 °F) to 40 °C (104 °F) as standard. Up to 55 °C (131 °F) with derating
- Humidity 95 % maximum (non-condensing) at 40 °C (104 °F)
- 1,000 m to 3,000 m (3,300 ft to 9,900 ft) above sea level: de-rate the maximum output current from the specified figure by 1% per 100 m (330 ft) above 1,000 m (3,300 ft)
- Storage temperature -40 °C (-40 °F) to 70 °C (158 °F)
- Mechanical Shock Tested in accordance with IEC 60068-2-27
- Random Vibration: Tested in accordance with IEC 60068-2-64

Safety

- Safe Torque Off independently assessed by TÜV to IEC 61800-5-2
- SIL 3 and EN ISO 13849-1 PLe
- UL 61800-5-1 (Electrical Safety)

Electrical conformance

- Electromagnetic Immunity complies with EN 61800-3 and EN 61000-6-2
- With onboard EMC filters, complies with EN 61800-3 (2nd environment)
- EN 61000-6-3 and EN 61000-6-4 with optional EMC filter
- IEC 60146-1-1 supply conditions
- IEC 61800-5-1 (Electrical Safety)
- IEC 61131-2 I/O

SIL3

Digitax HD & Unimotor hd Drive and motor combinations

400 V range – 0.7 to 51 Nm (6.2 to 451 lb-in)
with 300% peak stall torque

200 V range – 0.7 to 45 Nm (6.2 to 398 lb-in)
with 300% peak stall torque

200 V Three Phase

Nominal speed 6000 rpm - 300% overload

Modular Multi-axis configuration

Sizing the common DC bus

Basic sizing of your system in 4 easy steps

- 1 Choose drive & motor combination based on speed and torque requirements [see pages 32 to 35](#)
- 2 Note nominal power & drive capacitance for each combination
- 3 Choose the drive to act as power supply for the drive group. Usually the largest drive
- 4 Check that:
 - Sum of drive capacitance \leq Maximum capacitance**
 - Sum of nominal power \leq Maximum input power**
(Refer to tables opposite.)

Digitax HD drives have a high capacity input power stage, allowing for a group of drives on a common DC bus to be powered by a single AC connection.

Alternatively, for larger configurations an external DC source can be used, such as a larger frame Unidrive M.

* External AC Line Reactor required. Please refer to the Installation and Technical Guide.

** If any of the values are exceeded, the system needs to be split in groups and the procedure repeated for each group.

		200V			
		Max Capacitance (μF)	Internal Capacitance (μF)	Max Input Power (kW)	Max Input Power (hp)
Size 1	M75x-01200022	5800	580	4 / 5.2*	5.4 / 7.0*
	M75x-01200040				
	M75x-01200065				
Size 2	M75x-02200090	4640	1160	5.3 / 6.9*	7.1 / 9.3*
	M75x-02200012				
Size 3	M75x-03200160	3760	1880	6.3 / 10*	8.5 / 13.4*

		400V			
		Max Capacitance (μF)	Internal Capacitance (μF)	Max Input Power (kW)	Max Input Power (hp)
Size 1	M75x-01400015	1900	110	6.5 / 8.5*	8.7 / 11.4*
	M75x-01400030				
	M75x-01400042				
Size 2	M75x-02400060	2030	290	8.7 / 11.4*	11.7 / 15.3*
	M75x-02400080				
	M75x-02400105				
Size 3	M75x-03400135	2210	470	10 / 13*	13.4 / 17.4*
	M75x-03400160				

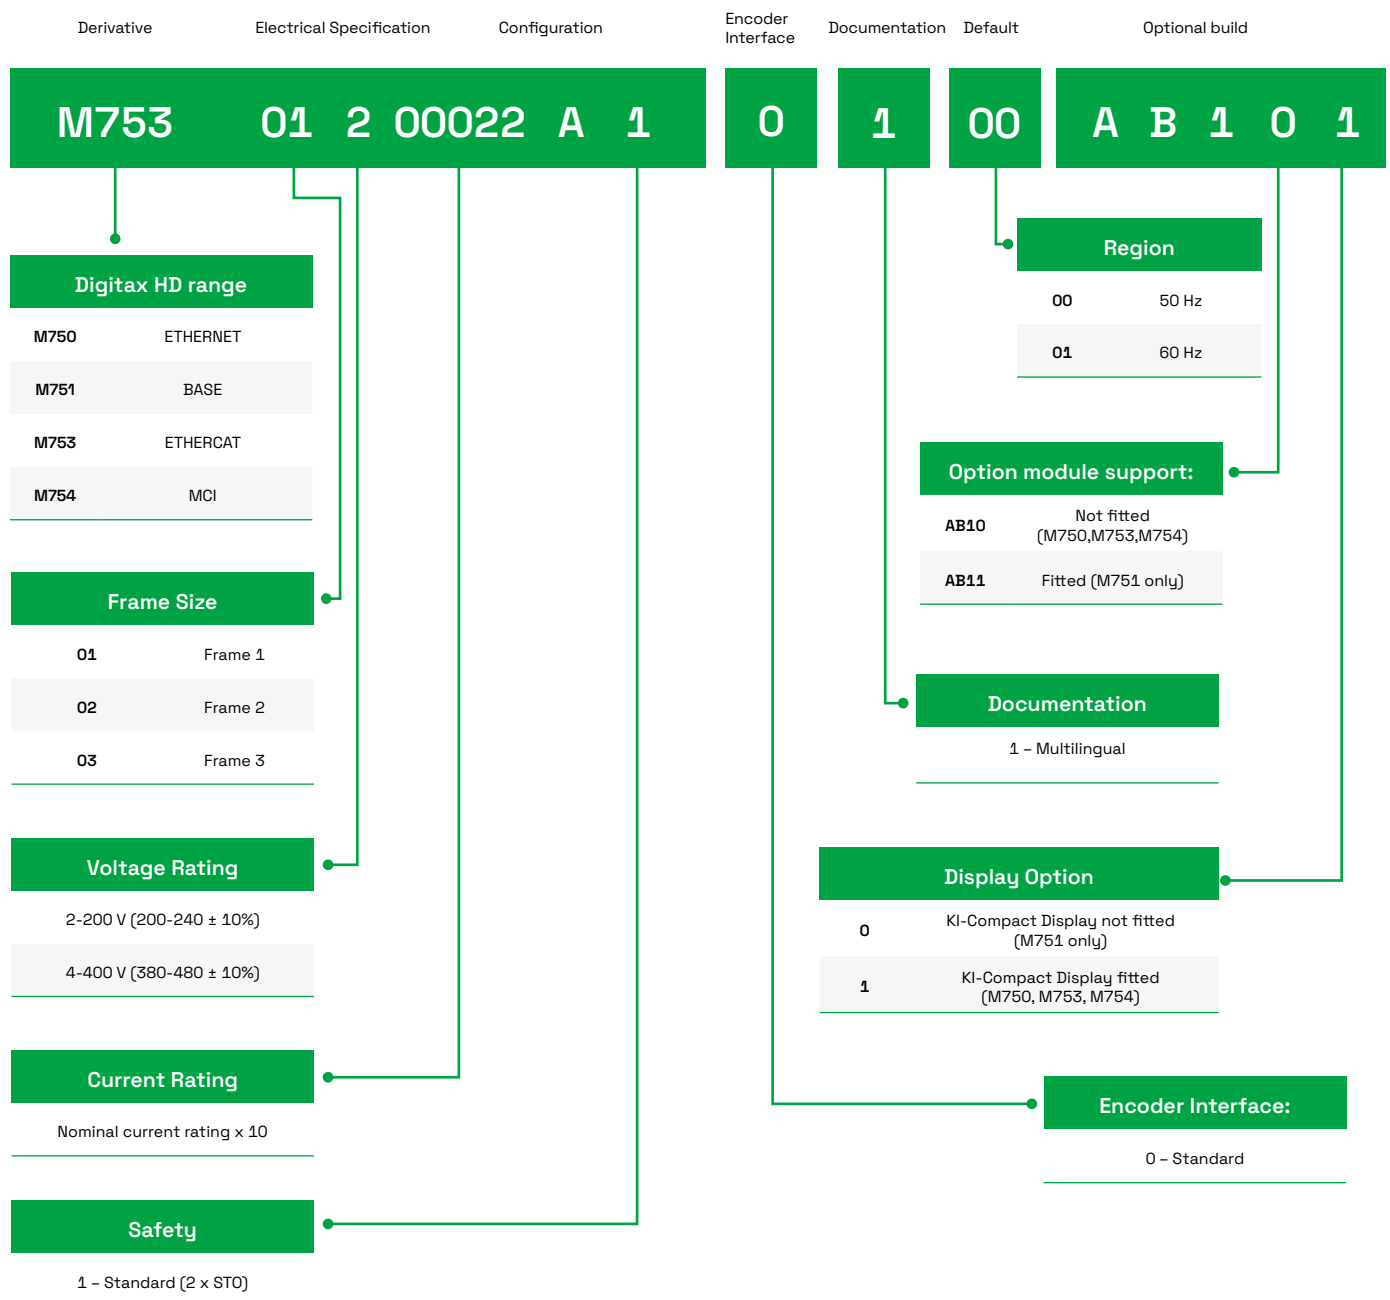

NOTE: The number of drives that can be connected on a common DC bus group depends on the total installed capacitance, the power rating of the input stage and the power profile of each axis. There is also a limit of 10 drives for the 24 Vdc link.

For optimised sizing please refer to the Installation and Technical Guide.

Digitax HD

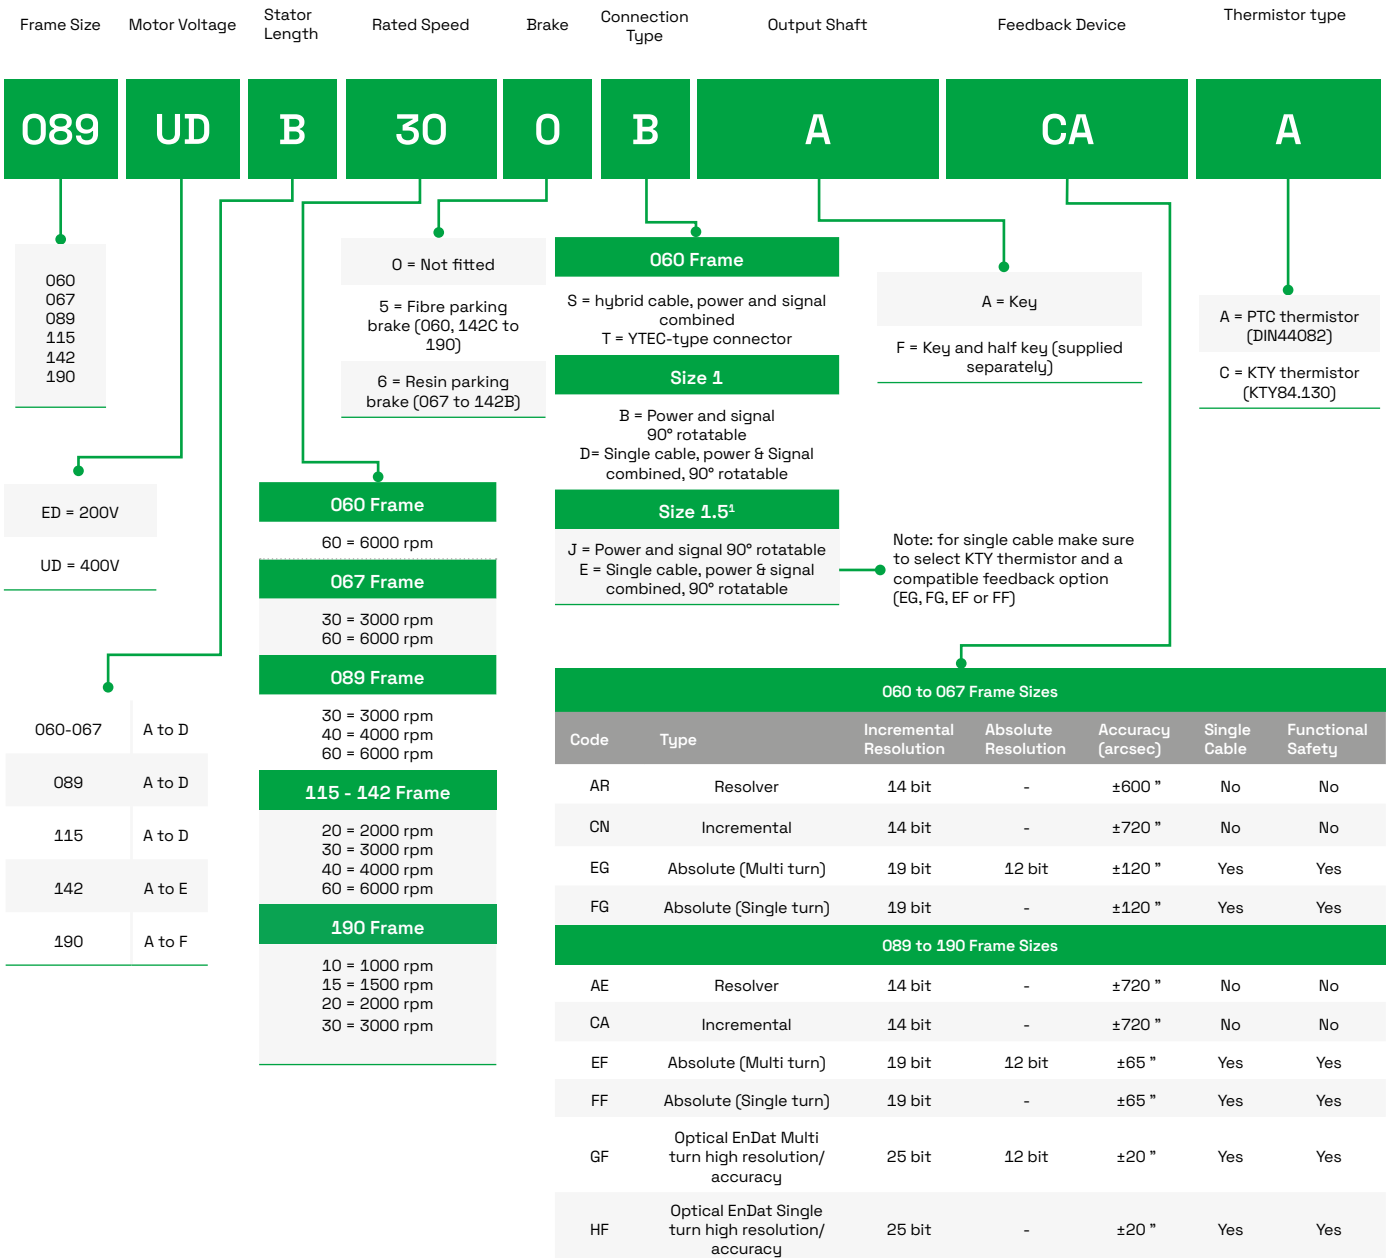

Drives

Product code structure

Unimotor HD Motors

Product code structure

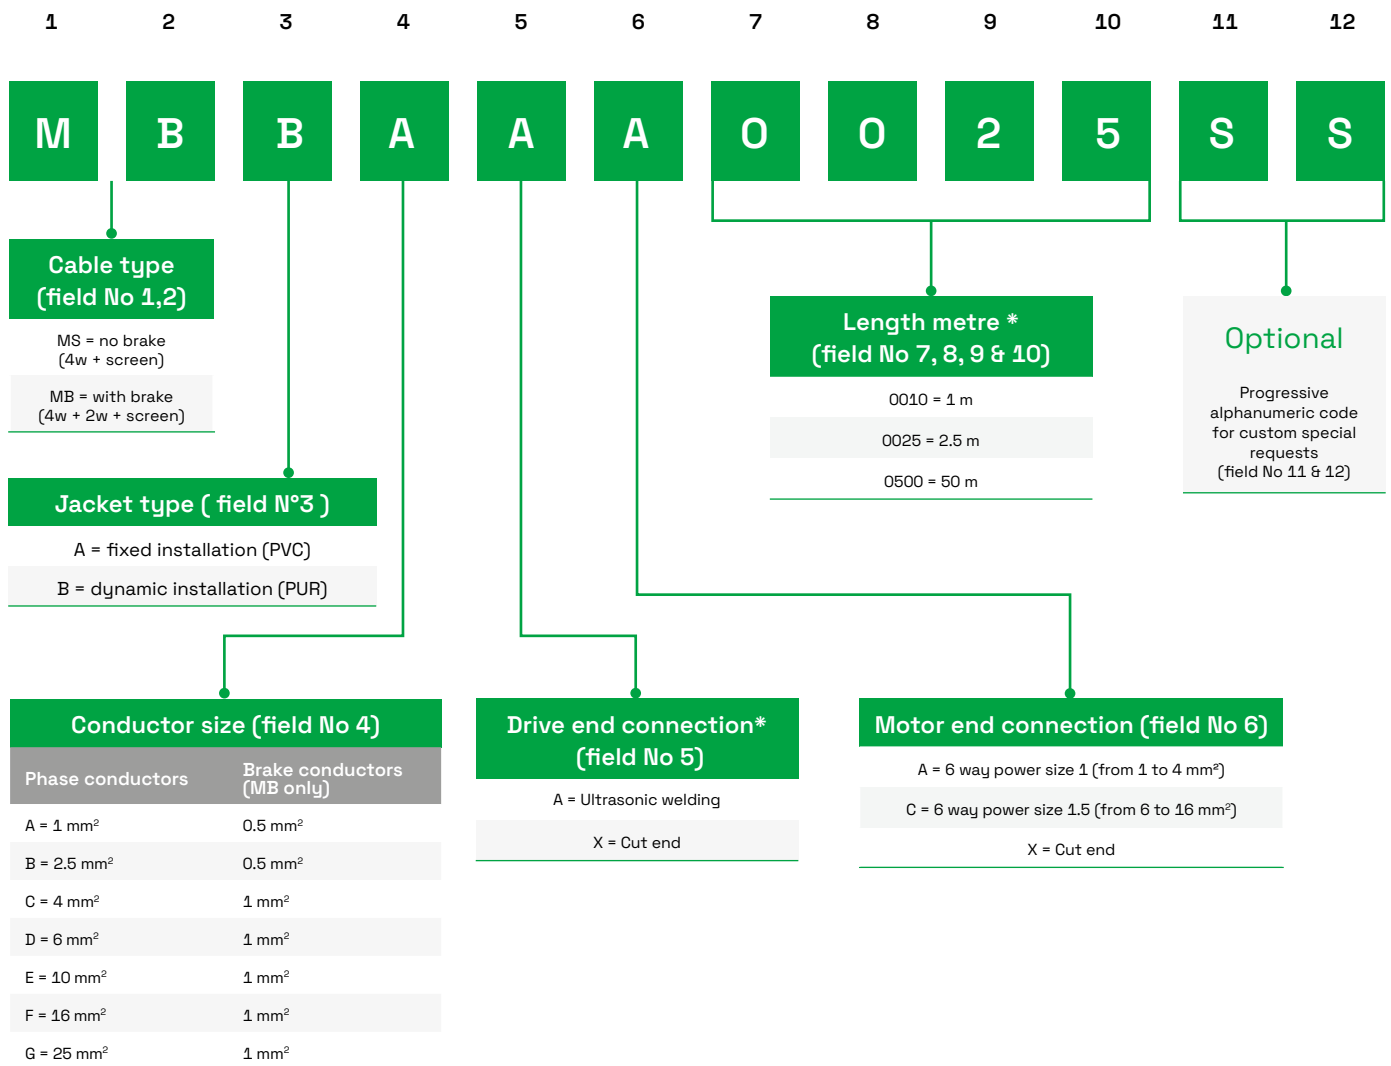

¹ See "Recommended power connector size" in motor rating tables p. 50 onwards

Additional feedback options available on request.
for Functional Safety up to SIL 3 please add -SRES at the end of the product code

Cables and connections

Power cable

Product code structure

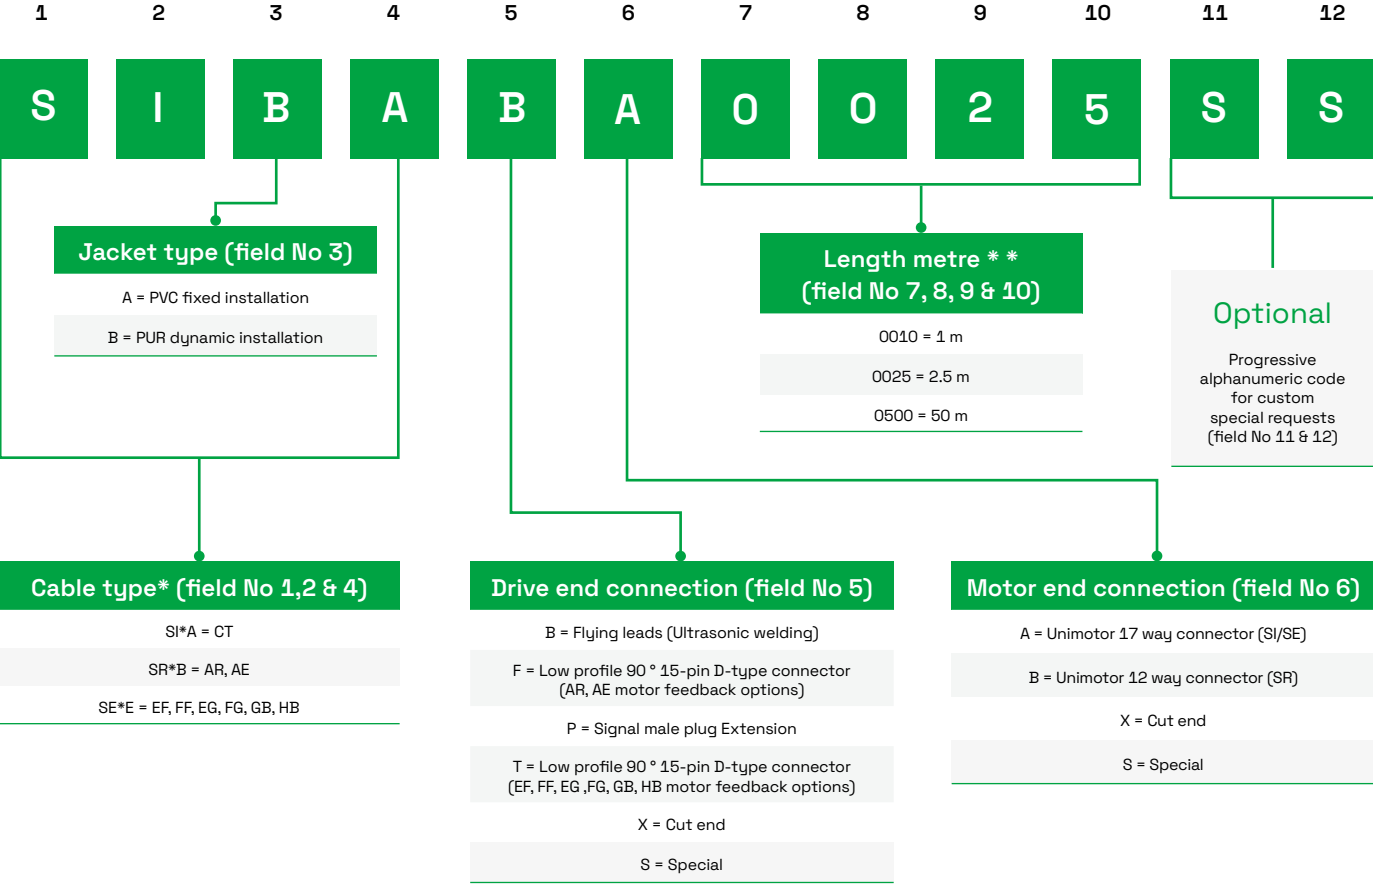

* Cable length is always rounded up to the next half metre; Eg. 2.1 will be changed to a 2.5 m cable. Maximum cable length is 50 m.

Cables and connections

Signal cable

Product code structure

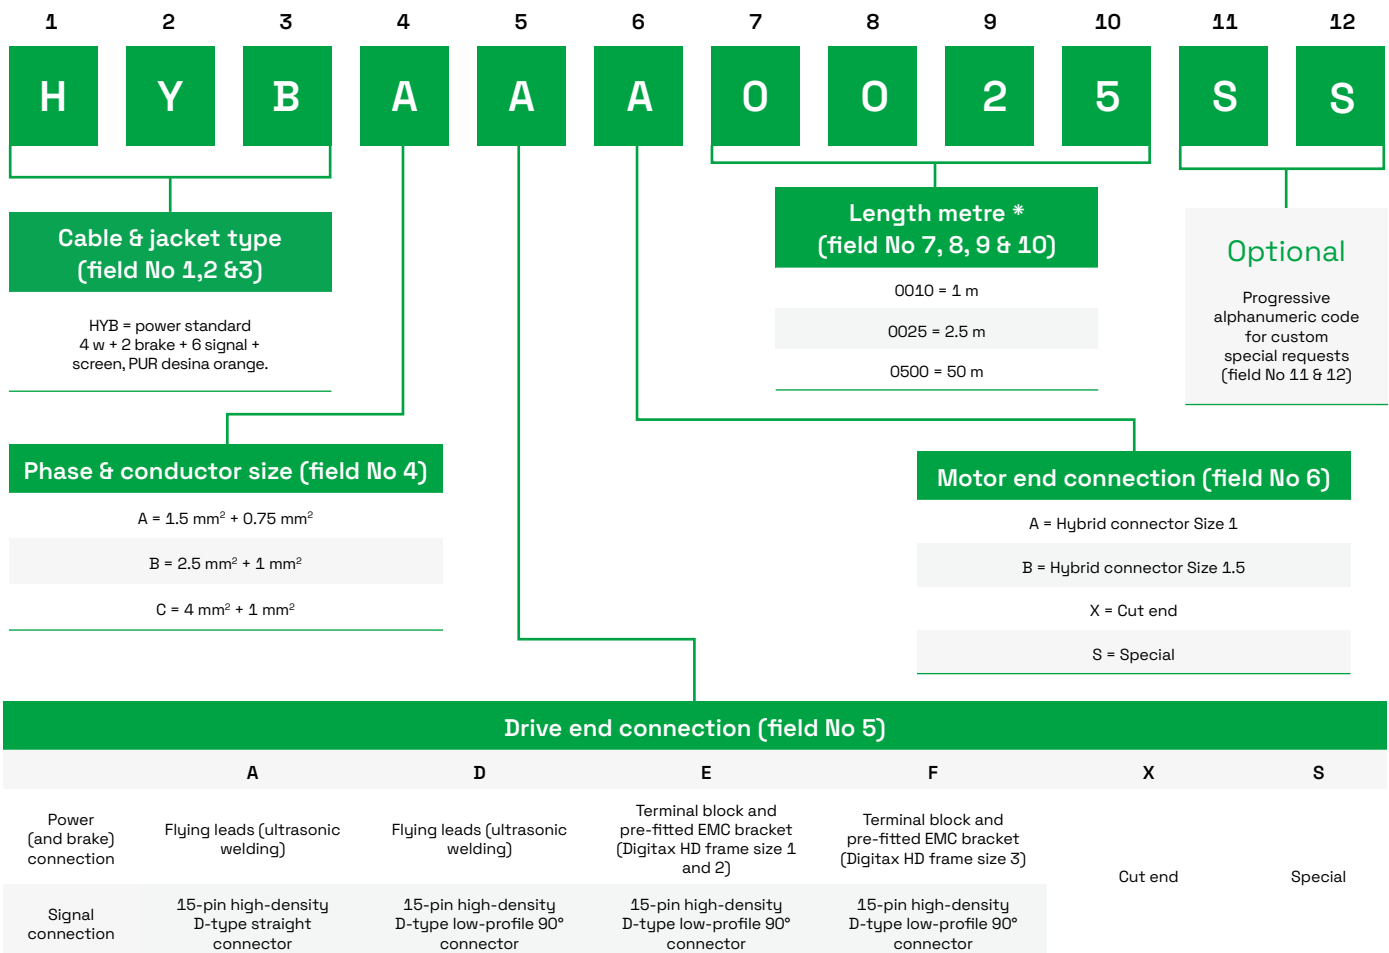

* Selected based on the "Feedback Device" field of the motor product code key, see page 38.
e.g. 067UDB300BACRA would require a SIBAF A0050 cable part number.
** Cable length always rounded up to the next half meter; Eg. 2.1 will be changed to a 2.5 meter cable. Maximum cable length is 50m.

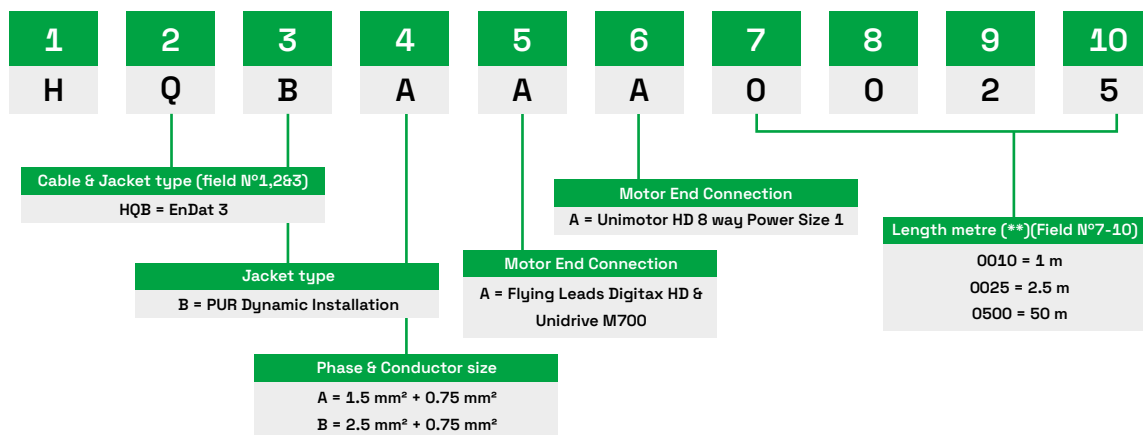

Cables and connections

Hybrid cable

Product code structure

* Cable length always rounded up to the next half metre; Eg. 2.1 will be changed to a 2.5 m cable. Maximum cable length is 50m.

Kits and accessories

Ordering guide

Multi-axis Kit

Product code	Accessory	Description
9500-1047		Multi-axis Kit (standard – without SI-Option Mounting Kit fitted) Ethernet comms
9500-1048		Multi-axis Kit (with SI-Option Mounting Kit fitted) Ethernet comms
9500-1073		Multi Axis Kit Standard - RS485 comms
9500-1074		Multi Axis Kit with SI-Option fitted - RS485 comms

DC bus accessories

3470-0145		External Cable Grommet Kit up to 6 mm ²
9500-1050		External DC Cable connection Kit up to 16 mm ²

Communications and Diagnostics

4500-0096		USB to EIA485 Communications Converter Cable
82700000020300		KI-Compact 485 Adaptor
82700000020400		KI-Compact Display
82400000019600		Remote Keypad RTC
82400000022700		KI-Keypad Plus

General accessories

Product code	Accessory	Description
4401-0236		Input Line Choke
3470-0158		Frame 1 Rear Ultraflow™ Vent Kit
3470-0181		Frame 2/3 Rear Ultraflow™ Vent Kit
3470-0185		Retrofit Kit – Epsilon 202-206
3470-0184		Retrofit Kit – Epsilon 209-216
3470-0182		Retrofit Kit – Digitax ST/SPO
3470-0183		Retrofit Kit – M'Ax
9500-1055		SI-Option Mounting Kit
9500-1053		Fan Replacement Kit (frame 1 and 2)
9500-1054		Fan Replacement Kit (frame 3)
82700000020200		Encoder breakout kit

Drive – Mountable Brake Resistor

9500-1049		Compact Brake Resistor Kit – 50 W, 70 Ω
-----------	---	---

External Brake Resistor

1220-2201		External Brake Resistor – DBR 100 W, 20 Ω
1220-2401		External Brake Resistor – DBR 100 W, 40 Ω
1220-2801		External Brake Resistor – DBR 100 W, 80 Ω

EnDat 3 Adaptors

82700000020500		Digitax HD adaptor for EnDat 3 encoders
82400000020500		Unidrive M7x adaptor for EnDat 3 encoders

Drive and motor cables available
Refer to pages 39 - 41.

◆ Not available

All data subject to +/-10% tolerance. Stall torque, rated torque and power relate to maximum continuous operation tested in a 20 °C ambient at 12 kHz drive switching frequency. All other figures relate to a 20 °C motor temperature. Maximum intermittent winding temperature is 140 °C.

42 mm shaft and 235 mm flange options are available. Refer to factory for more information.

Nidec

Autom

Innovatin
environn
comfort

The world's leading global manufacturer of electric motors and controls

Nidec, the world's largest motor brand.

Nidec is in everything, everywhere.

If you drive a car, wash your clothes, watch movies or talk on a smartphone, you're using Nidec technology. Almost anything that spins and moves, no matter how big or small, does so thanks to a Nidec product.

Our shared values of passion, enthusiasm and tenacity guide us on our collective journey to be the best.

Appliance, commercial & industrial motors

Energy efficient motor and drive technology for commercial, industrial, and home appliances

Automotive

Working to help improve safety, environmental protection and performance required for automobiles

Small precision motors

DC motors for all industries and applications

Motion & Energy

High-performance motors, drives, generators & energy management solutions for renewables, automation, infrastructure, and electric vehicles

Machinery

Machines, factory automation equipment, measuring, and testing devices
